

studio

art's desire

a unique collection. artistic resources.

Freda Vaughn, owner and creator of Studio Art's Desire, blends vision and artistic ability to form a cohesive union that satisfies both aesthetic desire and functional need. With a strong background in architectural detailing and interior design, she brings together the most talented artists and captures extensive resources to deliver the highest standard of services to clients.

Studio Art's Desire is a full service art consulting and design company. We provide creative, innovative and "one-of-a-kind" feature elements to the design industry. Our distinct site-specific installations are typically architectural in nature and personalized for each customer and space. They are dimensional, tactile, visceral – engaging the senses. Our team is dedicated to providing excellence and delivering timely results, while maintaining cost effectiveness.

Studio Art's Desire evolved from a passion for taking architectural design elements and translating them using very unique materials. The fundamental principles that inspired the studio's birth are the same that drive its success today: passion, creativity, attention to detail, energy, enthusiasm and follow-through. Studio Art's Desire offers forward thinking with traditional values.

Environmental Statement

Our goal is to provide artistic resources that encompass unique design and use of materials, as well as improved manufacturing/fabrication processes – all while maintaining environmental integrity. In essence, the design community has always understood that artistic elements are at the forefront of the sustainable thought process. The true beauty of art is that it is always repurposed.
